- Operating press brake to manufacture components from metal sheets
- Preparing, setting up and adjusting press brake according to product and production schedules
- Inspecting products to ensure they fall in line with quality standards and specifications
- Advising tool makers of defective tooling, jigs or fixtures
- Reporting Works Manager of any problems that may lead to production targets not being achieved

### PERSON SPECIFICATION:

- Self-motivated and enthusiastic.
- Flexible, accommodating, and positive approach.
- Use initiative to achieve results.
- Able to lift materials
- Desire to be a fully trained Machine Operator
- Takes full accountability for performance and development.
- Ability to work under pressure.
- Team player.

### REQUIRED SKILLS:

- Previous production manufacturing experience and knowledge of the production process
- Are able to understand and work from engineering drawings
- Have experience in operating Press brake controls
- Have experience of working with hand tools
- Previous experience of working within a strong safety culture
- Applicants will need to demonstrate attention to detail and reliability.
- Previous experience with fabrication would be beneficial for the Brake Press Operator role.
