

JOB SPECIFICATION – TRAINEE MACHINE OPERATOR
(LASER MACHINE)

REPORTING TO:

The Production Manager

SCOPE AND FUNCTION:

Training, education, and development of the CNC Machines. Primary focus is on learning how to operate and look after CNC equipment, to produce sheet metal fabrications on our CNC Laser. The role will include interaction with our Engineering department as well as Production Control and Quality Control. The trainee will learn about materials, how they are handled and how the different materials are processed on the equipment. The job entails understanding technical drawings and specifications, and it is likely that there will be machine programming and maintenance. The expected outcome of the apprenticeship is a position as a fully trained and qualified Precision Sheet Metal CNC Laser Machine Operator.

DUTIES:

The Laser Machine Operator duties will include the following; -

1. Use of CNC Laser machine
2. Manufacturing to Production schedules and times
3. Setting up Milling Machines, Pillar Drill, Lathes and other Production Equipment
4. Reading Drawings
5. Using measurement tools
6. Using a variety of hand and semi-automatic tools
7. Working with different materials e.g., Mild Steel, Stainless Steel, Aluminum, Plastics, etc
8. Grinding and De-burring
9. Mechanical Assembly
10. Problem Solving

PERSON SPECIFICATION:

- Self-motivated and enthusiastic.
- Flexible, accommodating, and positive approach.
- Use initiative to achieve results.
- Able to lift materials
- Desire to be a fully trained Machine Operator
- Takes full accountability for performance and development.
- Ability to work under pressure.
- Team player.

REQUIRED SKILLS:

- Previous production manufacturing experience and knowledge of the production process
- Previous experience of working within a strong safety culture
